Invitations Will Announce Senior Midwinter Dance

Admission Free to All Seniors; Expenses Financed From Class Treasury

Entertainment and Floor Show Scheduled as Special Feature

Only Members of Class of 1938 Admitted; Committee **Outlaws Stags**

Personal invitations to all members of the Class of 1938 will announce the annual Senior Dance, to be held Friday, January 7, in Walker Memorial from 9 to 2 o'clock. There is no admission charge, since the dance is sponsored by the class treasury.

Seniors and fourth year students will be admitted to this class function, which is the only one preceding Senior Week. The dance is formal, and there will be no stags. Beaver Club members will usher, as has become the established custom.

Entertainment and a floor show during intermission are being planned by the committee. As yet the orchestra selection is not definite, but the band will be announced this week.

This dance has become a traditional part of Senior activities, chairman John R. Cook, '38, explained, and has always proven one of the most popular functions given by the classes. Last year's dance, also held in Walker, had an attendance of over four

Technology Debaters On Labor Relations.

Freshmen Orators Will Debate Holy Cross, B. C., B. U. And Latin School

This week finds the debating club might take. preparing for their meet with Pem-

shall be empowered to enforce arbitration over all industrial disputes," is to be represented by L. Hurley Bloom, '40, and Robert Treat, '38. This is to be the first debate this year in the New England Inter-collegiate League in which M. I. T. is to take

part. Meanwhile the Freshman Debating team has postponed its meet with Boston College, which was to take place the week before Christmas, until February. However the yearlings are still scheduled for meets with Holy Cross, Boston University, and Boston Public Latin School.

This evening the club is to have a meeting at five P. M. in the West fessor of Meteorology, opened the Lounge of Walker Memorial. There annual series of popular science lecis to be discussion of proposed de- tures sponsored by the Society of bates and extemporaneous speeches.

Propellor Club Hears R. H. Rodey Tomorrow

Guest speaker at the Propellor ning will be Mr. R. H. Rodey of the of the effect of the rotation of the Boston Steamship agents firm, Nor- earth on wind directions. ton, Lilley and Co. The meeting will Room at 6:15 o'clock.

Course XIII-C upperclassmen met Mr. Rodey several weeks ago at the tea given for them by Professor Lawrence B. Chapman of the Naval Archi-

tecture department. According to David A. Wright, '38, President of the Propellor Club, all men may sign up in the Naval Architecture Library for the dinner.

T.C.A.'s Yearly Xmas Tree On Display in Main Lobby

As usual, the various departments of the Institute have cooperated in furnishing the impressive Christmas tree in the Main Lobby.

The Tree, donated and decorated by the T. C. A., is taller than that of previous years, according to Wally Ross, General Secretary. One hundred and fiftytwo icicles, adorning the tree, are the work of the "Glass Blowing Department" of the Chemistry Department.

Other ornaments include lights, a crowning top-piece, tinsel, and cotton "snow."

A.S.U. Condemns Foreign Nations

Boycott and Sanctions Urged At Student Meeting Last Friday

Resolutions condemning Japanese aggression in China and Italian and sanctions against these Fascist nations as a means of aiding the defending countries, were passed at the meeting of the Technology Chapter of the American Student Union last Friday evening.

Preceding the action on the resolutions was a talk on "Peace and China" by Mr. Francis H. Russell Boston attorney, who advocated American entry into the League of Nations as a means of furthering

Soc. of Arts Hears Doctor Willett Talk

Explains Earth's Atmosphere And Its Causes

Dr. Hurd C. Willett, Associate Pro-Arts, with a lecture on "The Air and Its Ways" on Sunday, December 12 at 4:00 P. M. in Room 10-250.

He discussed various types clouds, wind and storm zones, and methods of obtaining information about weather. Of special interest Club's dinner meeting tomorrow eve- to the audience was his examination

The next lecture in the series will be in the Walker Memorial Silver be given on January 16 by Dr. Ernst A. Hauser, Associate Professor of Chemical Engineering on the subject "Physics and Chemistry of Matter in the Colloidal State." The final two talks will be given on February 3 and March 13, by Professor John C. G.

Wulff and Dr. Truman S. Gray. . Next best is to do the homework Course XIII and XIII-C upperclass- for your next class which your distraction of the moment didn't let you do last night. And then there are

T.E.N. Features Dr. K. T. Compton In Current Issue

New Issue of Magazine will Appear on Stands Wednesday

Compton Discusses Engineers

"The Engineer in Industrial Relations," by President Karl T. Compton, is the feature article of the current issue of the T. E. N. appearing on the stands this Wednesday.

The author shows the importance of the engineer in modern industry, using as his starting point the fact, revealed in a recent survey covering 50,000 executives, that a graduate of a technical school is thirty times more likely to become a "Captain of Industry" than his liberal art school contemporaries. The article shows a contrasting point of view on a similar subject with that written last month by John L. Lewis.

Another article designed to appeal to a large majority of the readers is one on the Iron Lung and its use in controlling infantile paralysis. This German intervention in the Spanish is an extremely timely thesis in view civil war, and urging a boycott and of the publicity which has been given this medical innovation in recent

There are several other articles of particular interest to certain classes of readers. The rise and development of the electric organ during the last three years is presented with a short explanation of the principles involved in "Electronics in Music" writ-(Continued on Page 2)

A. I. Ch. E. Will Hear Dr. Morris A. Pozen On Thursday Evening

To Cover Brewing Process

Professor T. K. Sherwood will give a short talk regarding participation of chemical engineering students in the Stratton Prizes competition at the meeting of the American Institute of Chemical Engineers on Thursday evening, December 16th.

The president of the M.I.T. chapter, Frederick B. Grosselfinger, will then introduce the speaker of the eve-Process." Dr. Pozen is the director of the Brewing Research Laboratories of New York and has come to Cambridge to address the A. I. Ch. E.

A group of 16 students visited the refinery of The Colonial Beacon Oil Co. in Everett last Wednesday. A second group will visit the refinery on Wednesday, December 15th.

Fun in Lectures

Afflicted as we are with sixteen hours per week in lecture, we long ago found it necessary to devise ways and means of living through the week without dying of ennui. Most of them are not Original with Us; after Memorial was attended by about 150 all, there have been so many people couples and, according to Bernard W. in our situation before us that it is Mehren, '38, Chairman, realized not at all surprising to find that the profit of nearly \$100.00. various Ways and Means for the pur pose have been standardized.

Most important, most soul satisfyindulged in pastime is sleep. ("The dance floor. innocent sleep. . . . "). Some years ago one of the statisticians in Course XV figured out that Tech men live on 130% of their time. This means of course that sleep must be slept when leasing him from his instrument. it may, or it won't be.

RELIGION AND SCIENCE

THERE IS A CONFLICT

CEVERAL readers have taken issue with I the statement made in our editorial of Friday, December 3, which said, "we must recognize that there is a conflict between science and religion." In order to avoid futile argument on non-essentials, we have systematized our arguments in favor of that point of view. There are four parts to the argument, and if all are true then we can see no course other than to admit that there is a conflict.

The first two parts are in the nature of definitions, of science and of religion. Science we have defined as scientific method, as a distinctive way of explaining and interpreting phenomena, explaining the unknown in terms of the known, evaluating hypotheses by experimental facts.

Religion may also be considered a way of explaining phenomena. One of our correspondents has brought in Webster's definition of religion, "the outward act or form by which men indicate their recognition of a god." This definition does not contradict ours, as might seem at first, for the concept of a god is inherent in it, and to discuss the "outward form" we must consider the basic concept. But God has always been a mode of explanaion. We explain the origin of the universe in terms of God, we explain natural phenomena that we don't understand in terms of God. Religion, then, explains phenomena in terms of something unknown, and by definition inexplicable in terms of the known.

If we accept these two definitions as being true, if not necessarily complete, then the third part of our argument follows naturally: the two methods of explanation are incompatible when applied to the same phenomenon. If we explain something as being the "will of God" then we cannot at the same time explain it in terms of known physical phenomena. If we explain an emotional experience in terms of biochemical and biophysical reactions, then we cannot at the same time explain it as a supernatural manifestation. We must use one or the other mode of explanation.

If only these three points were true, then while there admittedly would be conflict between science and religion, it should be possible to eliminate this conflict by limiting religion to those groups of phenomena where science does not apply. But the fourth part of the complete argument states that there are no phenomena to which science-scientific method-cannot apply. A little thought would probably bring to mind many fields which have never been studied scientifically, but further thought will make one realize that scientific method can be applied to these fields, even though no scientist has done so yet.

The boundaries of science are limitless any phenomenon can be studied scientifically. explanatory hypotheses proposed, studied experimentally, rejected or revised, until a scientific explanation, not depending on the supernatural, is reached. The experimental difficulties may be great, but every phenomenon which is manifest to a human being in any way can be studied scientifically.

The four parts of the argument, then, are: Science is a way of explaining phenomena in terms of the known and the experimentally verificable; religion is a way of explaining phenomena in terms of the supernatural, the unknown: the two modes of explanation are incompatible when aplied to the same phenomenon; and science is applicable to every phenomenon of which man can be aware.

If these four points are true, and we believe we have shown that they are, then there is no other conclusion possible except that there is an inherent conflict between religion and science.

(Editor's note: In the next issue of The Tech, we shall discuss the interesting question of scientists' beliefs in religion, and also the question brought up in today's "Letters" column.)

COEDS' CRITICISMS

SHOULD BE CONSIDERED

ECHNOLOGY men should read very carefully what the coeds have to say about them in the "Dream Man" poll released

Discounting those remarks which are flavored with a desire for revenge on the men who heaped invectives on them in the "Dream Girl" poll, the general impression among the women at Technology is that the students are untidy, immature and lacking in poise.

The Technology man should examine himself in the light of these criticisms. If he finds himself lacking in any of these respects, he should make an earnest effort to correct the failing.

Life, even in a research laboratory, must be lived with people. Whether or not a position is obtained and whether or not a promotion is made are very largely contingent on personal impressions. The first thing the prospective employer sees is the individualhis appearance, his personality. So let us take the coeds' suggestions with good graces and thanks.

ARCHITECTS

ARE TECH MEN TOO

YEXT year will mark a milestone for the student body of Technology when the Institute will again stand as a unit, drawing no line between engineer and architect.

For many years Institute departments considered themselves self-contained units, but in the last few years, under the leadership of President Compton, interdepartment cooperation has been increased tremendously.' The physical isolation of the architects has made cooperation in their case difficult, and in student activities, with no guiding hand to assist, interrelations have been negligible.

Next year a great deal of new life will flow into the veins of Technology when beauty and design are added to the formulae and mathematical precision of the rest of the Institute. Not only will the officers and the staff benefit, and the students through them, but the students themselves should be anxious to have new ideas come into their activities and organizations. There seems to be some fear on the part of the architects that they might be absorbed into some sordid mass that they think comprises the Engineers. In truth, there is not a chance of this. Their ideas are complementary to those of the engineers and will serve to season the life of men who might otherwise become dull.

Letters to the Editor

Religion and Science

The Editor of The Tech:

The main objection I find with replacing God with science in the formation of a philosophy of life is that without religion there is not enough incentive to do good. Where would the United States be today but for the religious incentives in Washington and Lincoln? What leads men to die for the good of humanity in testing disease treatments and in other

A man who worships only science will have so little incentive to do good that he will in the majority of cases finish his life without having justified his existence. The world needs men dedicated to the service of others, and without religion it will not get enough of them if it gets any at all.

-Stanley Marple, Jr., '41,

Reviews and Previews

METROPOLITAN - Pat O'Brien, Wayne Morris, and George Brent take over the screen in Submarine D-1 while Bunny Berigan and his swing band perform on the stage. Opening Thursday is Manhattan-Merry-Go-Round, a musical with Ann Dvorak, Phil Regan, Cab Calloway, and Joe DiMaggio, on the stage is Major Bowes' Collegiate Revue with amateurs from the leading universities.

FINE ARTS-Monastery is a story of the life and rites of monks, perporting to answer questions often isked about why they withdraw from earthly joys.

PARAMOUNT AND FENWAY-Frances Farmer and Ray Milland are playing in the colorful technicolor Ebb Tide, also Edward Arnold, and Shirley Ross in Blossoms On Broadway. Icemen Defeat Brown; Hoopsters Lose

Engineer Skaters Defeat Big Bears In Opening Game

Three Unassisted Goals Scored By Grace and Langs Against Brown

Icemen Meet Northeastern. B. C.

Making a strong comeback after the decisive whitewash by the Harvard powerhouse, the Beaver pucksters last Friday overpowered the Bruins in their Providence lair by the tune of 3 to 2. Grace, at left wing, scored two of the tallies unassisted in the second performance guarding the Cardinal and Gray nets.

Leading the Bruins, Danny Hicks tallied on an assist by Fagan amid some fast skating that melted a path Lord Jeffs Overcome into Carnrick's quarters within the first minute of play. As the second period began, Grace scored his first shot from the sideboards within eighteen seconds. After twelve more minutes of scrimmage, he again scored this time after sneaking past the Bruin defense. Careful goal play on the Tech side of the rink turned away a barrage of enemy pucks as the period came to a close.

Langs Tallies Unassisted

Putting the game really "on ice," Langs at center for the Engineers, on an unassisted jaunt into the vicinity of the Bears goal, outmaneuvered Curtis to give Tech a 3 to 1 lead. This edge was cut down in the second half of this closing period when, after fourteen minutes, Fagan shoved one past Carnrick to make the final count 3 to 2 in favor of the visitors.

Tech, with its confidence regained, will meet Northwestern Wednesday afternoon in a game at the Boston Arena, which will be free to all Tech students. Later in the week, on Friday evening at the Arena, the Institute icemen will tackle the skaters from Boston College.

The summary: BROWN

ing). SECOND PERIOD—M. I. T., Grace, 18s.; M. I. T., Grace, 12:22 Penalties—Welch (tripping), Acker (roughing), Welch (push-

Beaver Riflemen Defeat R.I. State

Intercollegiate League Victory Is Fourth Straight Win For Engineers

Continuing its string of victories, the Technology rifle team took its fourth straight shoulder-to-shoulder match last Saturday afternoon by defeating Rhode Island State College at Kingston, R. I.

This was the first of the New England Intercollegiate League matches in which the Beaver marksmen have participated. Because of the rules of the matches, the exact score can not be given yet, for the targets have to be sent to Washington where they are scored by the National Rifle Association. The approximate scores were 1283 for Tech to 1249 for Rhode Island. .

High man for the Institute was Phelps A. Walker, '40, with an individual score of 262. He was closely followed by John L. Ohlson, '39, who scored a 260.

Lounger

Freshmen Win Second Game of Season as Samuels and Jones Star

Wildcats Lead Entire Game

Out for revenge after their first defeat of the season at the hands of Harvard, a fighting Tech quintet lost to a superior New Hampshire team in a fast and furious game marked by spills and fouls by the score of 35

Starting the game with an early ead, the Wildcats were ahead at the half by a score of 23 to 18. Kangas drew first blood for the engineers, only after New Hampshire had annexed 8 points, when he sunk a field goal from the middle of the floor. Engineers Lose by 57-18 Count; From then on the scoring continued at an even pace for both teams until the end of the 1st period. There were no substitutions for the Beavers during the first half, Wright starting in place of Katz.

> The visitors managed to hold on to their lead all during the second half, despite substitutions of Wilson, Creamer and Katz, by Coach Mc-

Frosh Beat N. H. Frosh

In a preliminary game the Freshman team won its second game in as many starts, downing the New Hampshire yearlings by a score of 43-36. Paced by Captain Samuels and Jones who scored 17 and 16 points respectively, the Frosh quintet, trailing 23-Tech tackies Worcester Polytech 24 at the half, had to come back

An 8-8 tie score at the end of the period when the Tech Frosh forged The yearlings' followed in the var- into a 18-14 lead, Jones leading the Tech Freshmen were never headed, throughout the remainder of the game.

Jim Thompson Makes New Jump Record at Indoor Track Meet

Nagle '41 Takes Hurdle Event, Second in Shot Put And High Jump

Jim Thompson, '38, in breaking the Fech indoor high jump record with a leap of 6 ft. ¾ in., then winning the 12 pound shot-put, and John Nagle, freshman star, who scored a first in the 45 yd. hurdles, and took second in the high jump and shot put, were best of the afternoon. Stearns won the outstanding contenders in last Saturday's indoor track handicap

In 1935, Thompson tied Scott of Cornell for the outdoor intercollegiate high jump championship, with a jump of 6 ft. 3 in.

Results of the meet were:

Results of the meet were:

15-yard low hurdles—Won by Nagle (3.5s.)
second, Bishop (3.5s.); third, Welch (4.5s.);
fourth. Kyllonen (2.5s.); fifth, Walker
(scr.). Time—5 4-5s.
50-yard dash—Won by Hensel (scr.); second.
Oettinger (2 ft.); third, Kridel (scr.);
fourth. Renner (5 ft.); fifth, McNally
(4 ft.). Time—5 9-10s. fifth McNally
(4 ft.). Time—5 9-10s. fifth McNally
(4 ft.). Time—2 9-10s. fifth McNally
(5 fourth, Guttag (140 yds.); fifth, Koscyla (50 yds.). Time—2 m. 31s.
500-yard run—Won by Des Jardines (scr.);
second, Andrews (30 yds.); third. E. L.
Little (10 yds.); fourth, J. Quill (15 yds.).
Time—1m. 5s.
300-yard run—Won by Bushloff (10 yds.);
second. Oettinger (7 yds.); third, Muller
5 yds.); fourth, Kridel (scr.); fifth, Hensel (scr.). Time—35 6-10s.
Broad jump—Won by Walker (6 in.); second, Kites (scr.); third, Latking (1ft.
10in.); fourth, Hamilton (1ft. 6in.); fifth,
Berry (1ft.). Distance—19ft. 5 in.
Shot put—Won by Thompson (scr.); second,
Nagel (2 ft.), tie for third between Ross
(9 ft.) and Kites (8 ft.); fifth, Welch
(9 ft.). Distance—49ft. 8%in.
High jump—Won by Thompson (scr.); sectond, Nagel (5 in.); third, Hamilton 1 in.);
tie for fourth between Bishop (8 in.) and
McNally (8 in.). Height—6ft. %in.

Christmas Tree

The 152 icicles adorning the Christmas Tree in the Main Lobby represent the work of the "Glass Blowing Department" of the Chemistry Depart-

Other ornaments are tinsel, "now" (cotton), lights, and a crowning top-

The tree, donated and decorated by the T. C. A., is taller than that of previous years, declares Wally Ross.

Racketeers Conquer Trinity by 5-0 Count

Meeting Trinity in its second game of the season, an undefeated Tech Squash team won another victory by a 5-0 score over the Trinity men last Saturday. Previously, the Summersmen had defeated the University Club Blues 3-2.

The match between Cy Stearns of Tech and Jackson of Trinity, a very formidable opponent, proved to be the 12-15, 15-11, 18-15, 16-14.

The other scores were: Babcock, Tech, defeated Leon, Trinity, 15-11, 15-8, 12-15, 15-12. Ellis, Tech, defeated Upham, Trinity, 1512, 15-12, 15-9. Vallone, Tech, won over Widdenfield, Trinity, 15-11, 17-18, 18-16, 1512. Thackara, Tech, beat Bates, Trinity, 1315, 15-5, 15-13, 13-15, 15-8.

Tomorrow the team travels to Harvard to meet the Crimson squashmen.

Crimson Aggregation Overwhelms Matmen

Wrestling in their first match of the season, the Institute matmen finished on the short side of a 30-0 score in an encounter with a strong Harvard aggregation last Saturday in the ply, the manual exchange, and the hangar gym. Losing five bouts by decisions and three by falls, the Beavers could not overcome their Crimson foe.

The only close contest came in the 126 lb. division when Dailey of Harvard threw Stone '40, of Tech in an overtime bout. Vanderpool put up a good fight in his match, but lost by a close decision.

the poll, which pictures the ideal as an aesthetic, irreligious dreamer, who is frank, likes a good argument, and is overwhelmingly sensible in dress. Strangely enough he is a talkative man whose family, although it has more money, is of the same social standing as the coed's family.

Harvard Favorite Man's College Harvard, belittled by Technology men, is the favorite man's college, according to the poll. Next, the frail engineers like Dartmouth, and third, their own colleagues.

DUKE UNIVERSITY SCHOOL OF MEDICINE

DURHAM, N. C.

Four terms of eleven weeks are given each year. These may be taken consecutively (graduation in three and one-quarter years) or three terms may be taken each year (graduation in four years). The entrance requirements are intelligence, character and at least two years of college work, including the subjects specified for Grade A medical schools. Catalogues and application forms may be obtained from the Dean. forms may be obtained from the Dear

A. I. E. E.

A visit to the Bowdoin Square Tele phone Exchange is scheduled for to day and tomorrow by the Technolog Branch of the American Institute of Electrical Engineers.

The electrical engineers will inspec the relay mechanism, the power sup test board of the New England Tele phone and Telegraph Company's Bow doin Square Exchange.
